Director's Message

It's been three months since I started serving as the Director of this prestigious institution and I couldn't be more energized! The enthusiasm and passion that is palpable every moment I spent in this campus is contagious to say the least. I am amazed with inherent calibre of our staff and students and the unflinching sense of purpose to learn and grow together. Our founders and former leaders have established a world class centre of education and propelled us in the right direction, we are going to stay true to their values and vision. We strive to 'mould world class professionals by enabling knowledge acquisition for research and development, design of novel systems and scientific analysis with focus on team work culture, continual learning, creating sustainable environment and noble society using modern technologies'. The world is going through massive disruptions and our fresh graduates have an opportunity like never before to fuel this change and build a better world for the benefit of humanity. I urge each one of you to stay focused on executing your duties in the best manner possible and make excellence a way of life.

Fr. Bejoy Arackal

Principal's Message

"Education is the most powerful weapon which you can use to change the world." — Nelson Mandela.

Education drives away ignorance and through illumination, it emboldens a man to righteous thought and action. Success comes to those who work hard and stays with those who don't rest on past laurels. LMCST started its journey in the year 2002 with the vision to establish a "Centre of Excellence" in the field of Engineering and Technology to mould world-class professionals. In order to accomplish our vision and mission, we are prepared to make as much effort as possible for the betterment of the academic scenario in India. We believe that education is an effective medium of social transformation. We get encouragement, looking at bright and successful careers of our thousands of students, which subsequently benefit society. We feel proud that we are part of such an excellent institute shaping modern India. Our college cares for the individual development of each and every student and we follow the "Staff Advisory system". We accord prime importance to our students' behavioral discipline, moral integrity, and cognitive development. Clubs or Cells of IEDC, NSS, CGPU, and NCC offer integrated services for the multi-faceted developments of our students. Our teachers strive to teach not only academic programs but also life skills needed for the student's self-development. I wish you the best and let peace and prosperity be to all who contribute to the noble task of spreading education and its manifest qualities, aims, and objectives.
